

OFFICE OF THE LIEUTENANT GOVERNOR

Tregenza A. Roach, Esq.
Lieutenant Governor, U.S. Virgin Islands

DIVISION OF GEOSPATIAL INFORMATION SYSTEMS (GIS)

OUR MANDATE

- ✓ GIS is responsible for providing the critical geospatial backbone for the Territory. GIS manages the development, maintenance, and distribution of Virgin Islands infrastructure, GIS information and related databases.
- ✓ GIS uses the power of modern mapping technologies to improve the Territory's functions and achieve cost savings through increased efficiency, better informed decision making, enhanced communication, accessible and simplified recordkeeping and increased citizen engagement.

OUR SERVICES

GIS networks with and provides services to local government agencies, federal government agencies, and the private sector through the administration of the GIS platform.

GIS is widely known for its Street Addressing Initiative (SAI). At its completion, GIS will develop a Master Address Repository that will link with other systems, databases and applications through government and service providers.

The Master Address Repository will play a critical role in:

- Saving lives in the community by allowing emergency services providers to be more efficient in the provision of services
- Enhancing the Territory's participation in the U.S. Census, allowing for greater access to federal funds.
